

Australian Mining Product and Services Pty Limited

On-site labour and Rubber liners - Blasting, abrasion & corrosion, Chemical protection lining , poly urea spray

Material Handling Mine Hoses - Rubber or Ceramic Inner lining

Pipe Repair Clamps

Expansion Joints

Gaskets

Australian Mining
Product and Services

making things simple - it's what we do !

Rubber lining and Ceramic tiling - Spools and Transfer Points

Wear liners - Rubber - steel - Ceramic - Composites - Ceramic tiles and Rubber wear rubber sheets, adhesives and extrusions

Ceramic Lined Valves

Screen Media

Fabrication

On-site Blasting and
Poly-urea spray protection

Delivering what's needed

Quality

Extend current reliability

Measurable results

Australian Mining
Product and Services

**making things simple
it's what we do**

budgets set

Delivery commitments

Options

One source

If you offer Solutions,
they are JUST That "another solution".
Australian Mining Product and Services
provide end-users, with knowledge to assist
with design and product choices to potentially deliver a
"MEASURABLE" result.

Pipe Repair bandages with leak seal epoxies

Magnetic Wear Patches

RbSic, Teflon and HDPE lined pipes

UHMWPE– Glass Filled boltless linings

Pipe repair Clamps and Couplings

Valve refurbishments

We offer end-users a range of options to empower them with sufficient and relevant information to assist in the selection of a product and it's design.

This selection allows for a measurable result that can be used to aid continuous improvement and a reduction in maintenance costs

We make the process simple

“It's what we do“

Every product is designed to improve plant production and reliability, ensure safety and facilitate a reduction in unscheduled maintenance stoppages

Operational areas that we service

- Mineral ore extraction e.g. chalcopyrite, rare metals, coal, iron ore, gold, lithium
- Quarrying
- Mineral ore beneficiation and processing plants – water/slurry lines and process equipment
- Oil & Gas supply lines and process equipment
- Water and Waste: supply & transfer lines, potable, slurry
- Power generation: cooling water, ash transfer, and process lines
- Pulp and Paper: supply & transfer lines
- Sugar Mills: supply & transfer lines; process industries
- Ore transfer: rail, road and sea material handling plant and equipment

Save on downtime costs

**Pipe repair clamps, couplings
tapping saddles to 64 Bar**

Liners - any material
Magnetic wear liners and Patches - (1500
kg pull force per M/Sq

eliminate Hotwork and manual handling

**Pipe Repair Bandages tested to 6 Mpa
with Leak seal epoxy**

www.australianminingservices.com.au

**49% Polyurethane impregnated ,
fibre glass Pipe repair bandages
with leak seal epoxy**

50 mm width x 5000 mm length

75 mm width x 5000 mm length

125 mm width x 6000 mm length

125mm width x 12000 mm length

Field tested to 6 Mpa

Composite Ceramic magnetic backed liner

Magnetic Backed wear patches

—1500 kg/ Sq Mtrs Pull force

Many Sizes from 150 x 100

PTFE (Teflon) linings—HDPE or RbSic (Silicon carbide) linings

CUSTOM DESIGNED VALVES AND ACCESSORIES

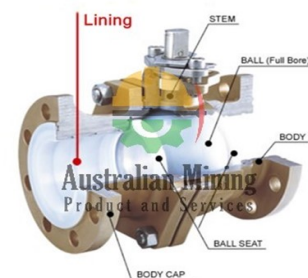

[PTFE lined VS PFA lined](#)

Lined valves are a safe and reliable solution to any level of corrosion flow for chemical industrial.

The lining of the valves and fittings ensures extremely high chemical resistance and longevity.

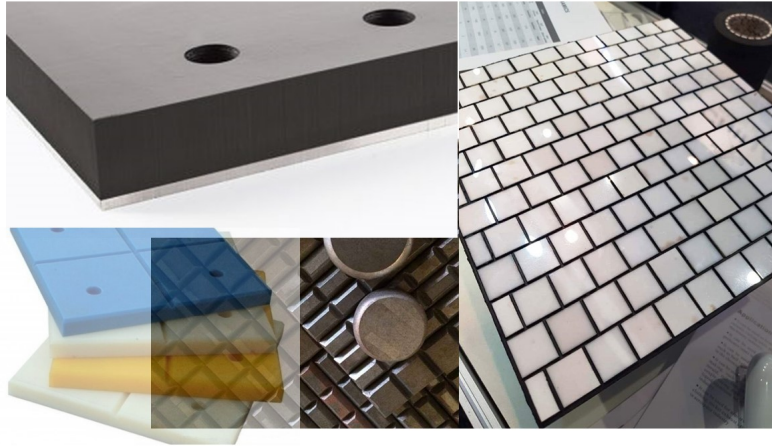

PTFE lined valve and [PFA lined valves](#) are the commonly used valves that used as more economic alternatives to high-grade alloys in corrosive applications in the chemical, pharmaceutical, petrochemical, fertilizer, pulp and paper, and metallurgical industries.

To know their difference, you must to know the material differences between PTFE and PFA.

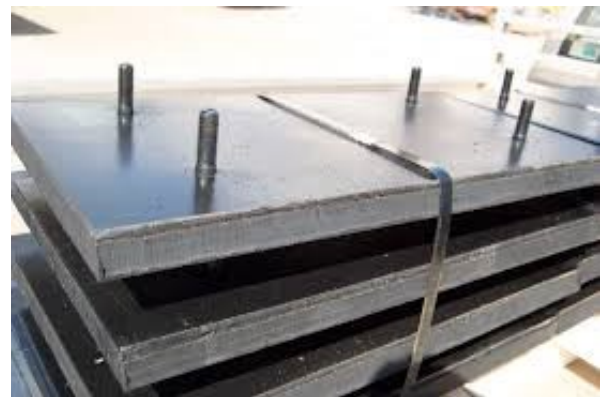

Ceramic wear linings— Alumina 92 or 95 %, ZTA, PSZ, RbSic ***— Moulded Rubber, Composite liners, customised***

Wear linings specifically tailored to applications

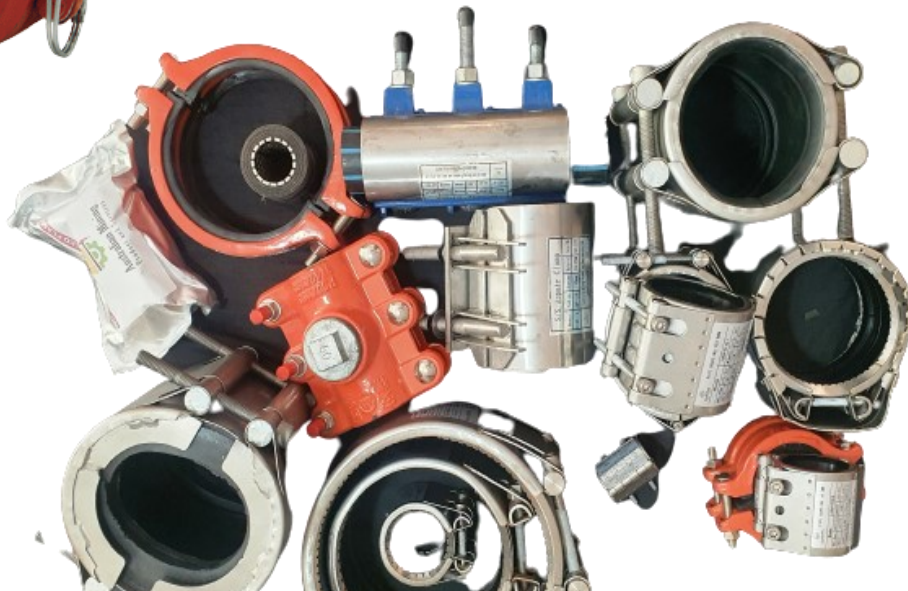

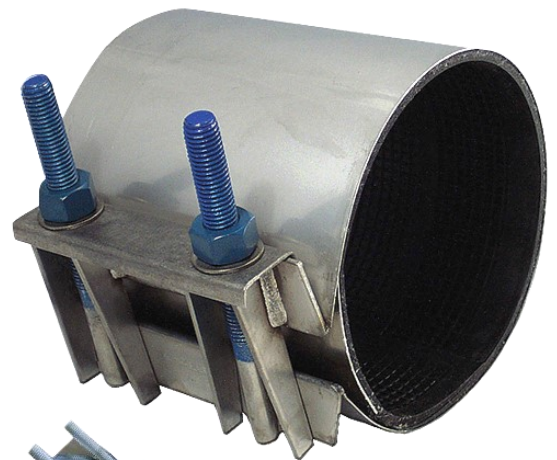

- Ceramic
- Rubber
- Steel— CCO, Alloys
- Polyurethanes
- Polyethylenes

Stainless Steel Heavy Duty Repair Camps

Grip Couplings

Stainless steel heavy duty pipe repair clamps used to repair and hold together either holed or cracked

Our Pipe Couplings—repair bands—for steel or HDPE pipes - joins or repairs

Online or Offline—Leak sealing

Pipe Repair Clamps and Couplings

Bandages with leak seal

Pipe Couplings hoses, carbon steel pipes

HDPE pipes and Pu or PE lined steel spools

Multi-function Pipe Repair Clamps and Couplings

Burst or cracked pipes are expensive to fix and lead to the stoppage of an entire operation.

Fix it with:

Pipe Repair Clamps, Bandages and Tapes

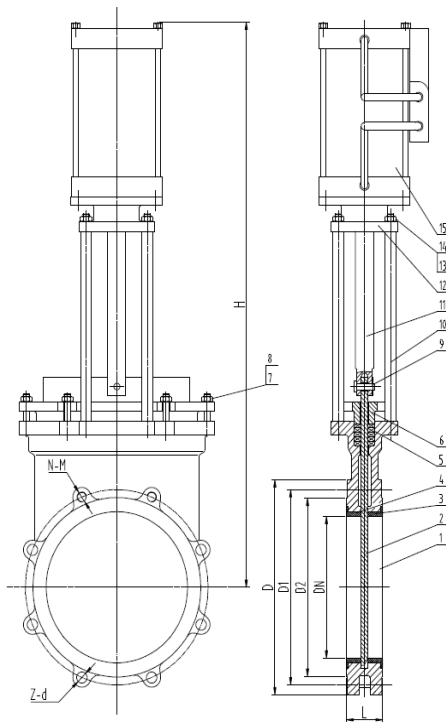

Widest range of valves in Australia - Any specification that required any seating material , SS —rubber—PTFE—Ceramic

Butterfly —Knife gate —Diaphragm - Pinch— manual or air

actuated and any flange type

Valves that outlast traditional valves, replacing wear parts with ceramic coatings and components

Expansion Joints—flanges

Sealing — Rubber, SS Spiral wound - Fabric or Fiber Gaskets and extruded rubber

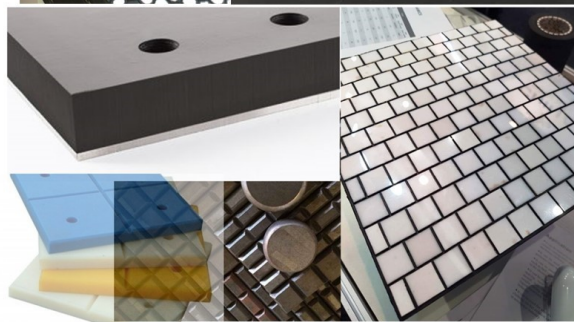

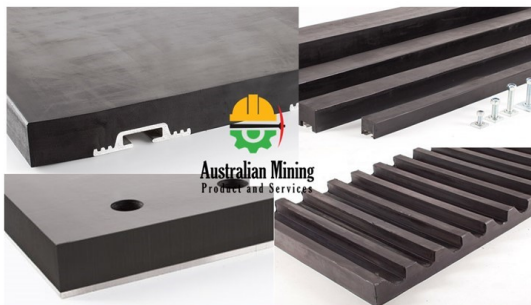

Fabrications—blast, chemloc—paint to specification with linings—rubber—ceramic—polyurethanes

Pump—refurbishments

WEAR LINING - Sheet rubber—moulded rubber modules - Moulded Rubber backed Ceramic liners with CN Back— Arco plate—CCO—Polyurethane—Ceramic tiles— Alumina , Zirconia Toughened Alumina, Reaction Bonded Silica Carbide

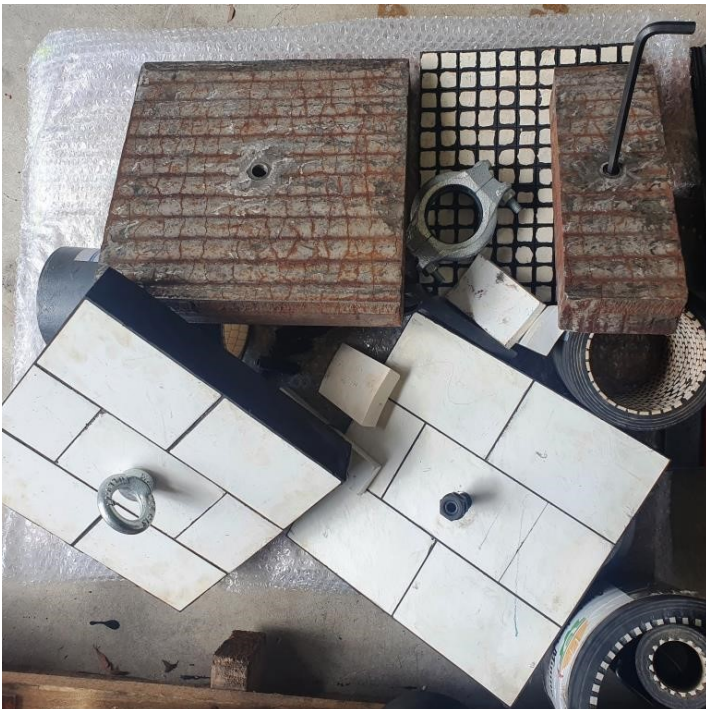

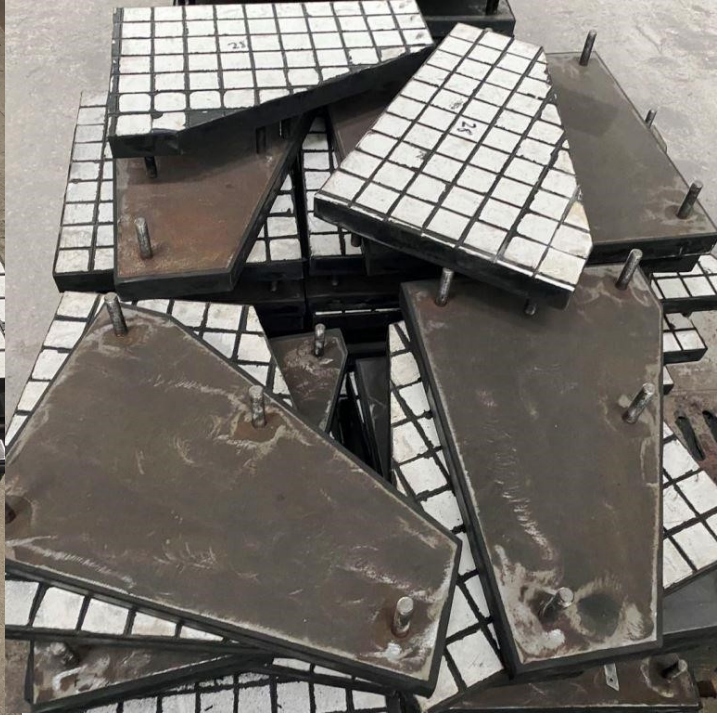

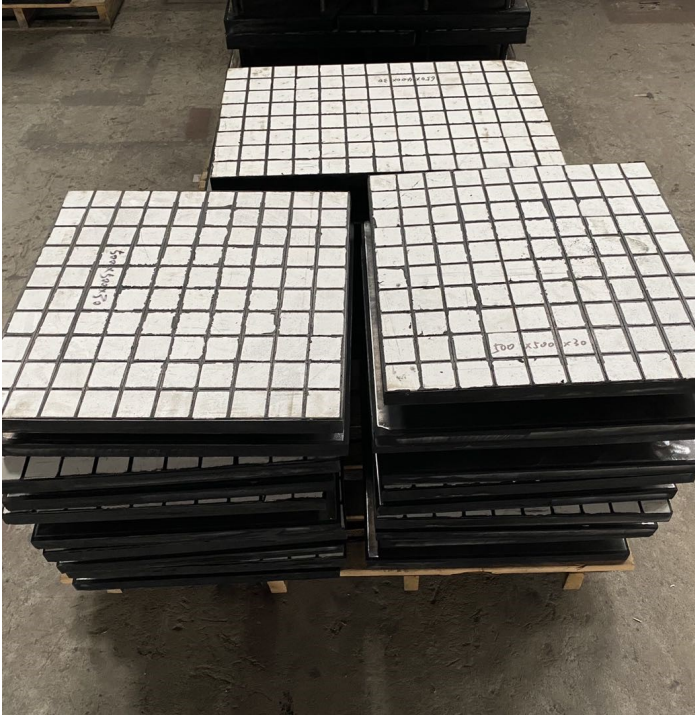

Fabrication, blast and paint services

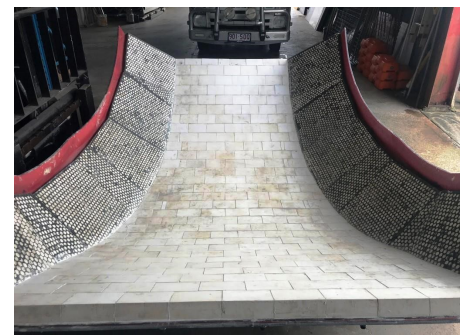

Ceramic wear liners and tiles

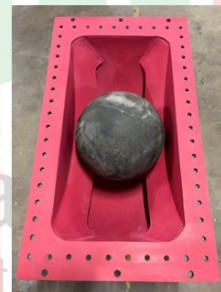

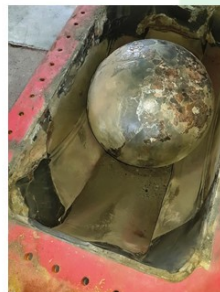

Direct bond, CN, plain or steel backed

Rubber lining and Ceramic tiling services - In House or On Site

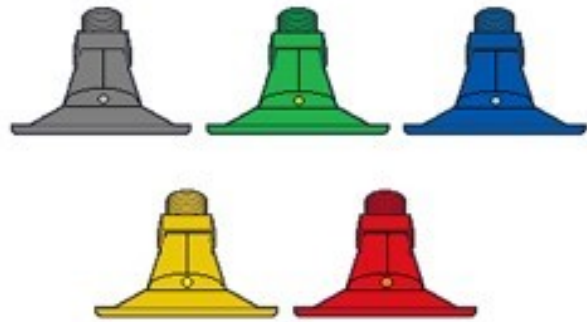

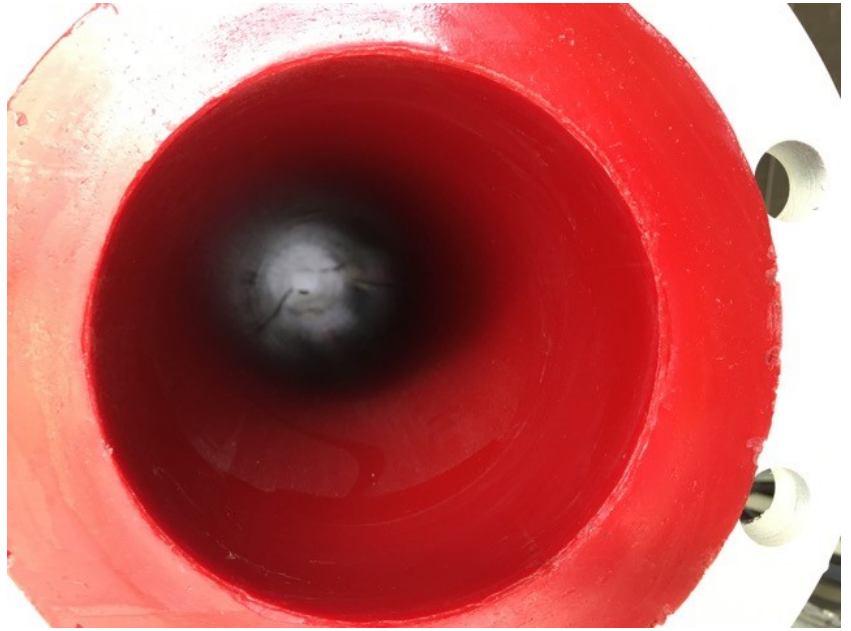

Hot Lining, on site tank lining and refurbishments

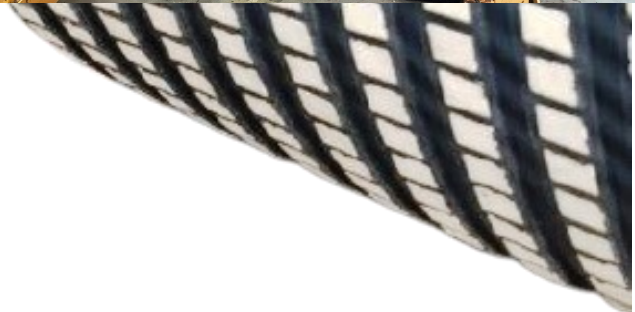

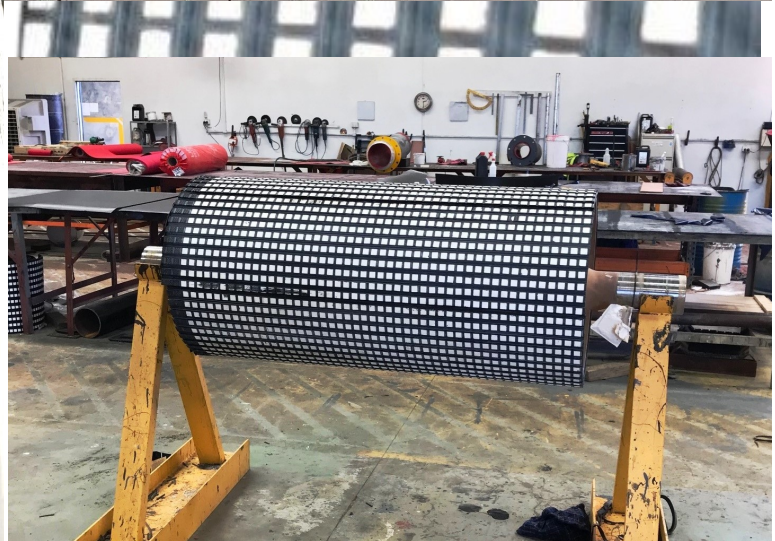

Material Handling Slurry and floating hoses and accessories with rubber or ceramic inner lining

Polyurethane

Hot or cold lagged and refurbishment of pulleys

Australian Mining Product and Services
ONE SOURCE

- Pipe repair bandages and pipe leak seal epoxy - 49% polyurethane impregnated fibre glass and leak seal epoxy— 6 Mpa tested with MSDS
- Magnetic wear liners and wear patches specifically designed to keep production in process and eliminate most unscheduled maintenance shutdowns—1500 kgs pull force per sq meter
- Ceramic—composite with wear rubber—buffed, CN, Magnetic or steel backed
- UHMW-PE, Teflon, Hot Vulcanised or Sheet Rubber linings
- Material Handling Slurry Hoses— ceramic or rubber lined
- Slurry Handling pipes & accessories - Ceramic, rubber, steel, HDPE lined
- We fabricate and line metal spools and bends
- Valves - pinch, Gate, Butterfly, Diaphragm, - Pneumatic, Manual, electric operated, Lugged or flanged Controllers and one-way valves
- Specialist Brushable or trowable Ceramic or polyurethane epoxies
- Ceramic pipe and chute tiles
- Expansion and vibration Joints, rubber, PTFE or metallic
- Pipe Repair Clamps, Couplings, Seals/gaskets and accessories
- Stainless steel leak arrest clamps with Nitrile inner or fire proofed will instantly stop most leaks
- Ductile iron pipe repair clamps
- Pipe tapping machinery
- Pipe Tapping saddles flanges - Table E, Table D, ANSI - galvanized, zinc alloy or stainless steel
- O Rings, seals, gaskets in steel , graphite, fabric, rubber— gland packing
- Steel galvanized pipes with Victaulic or flanged ends
- Flexible metal hoses

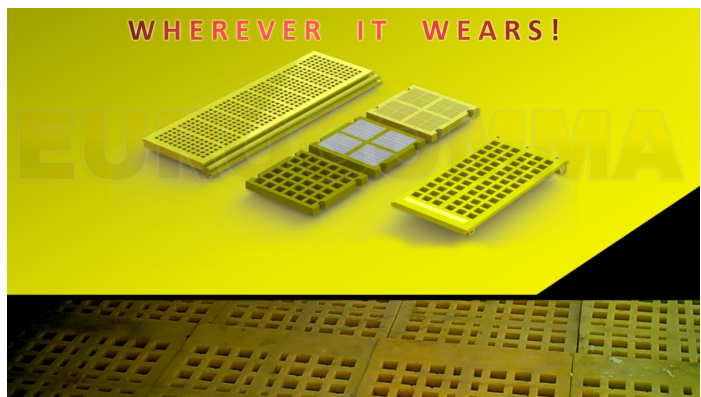

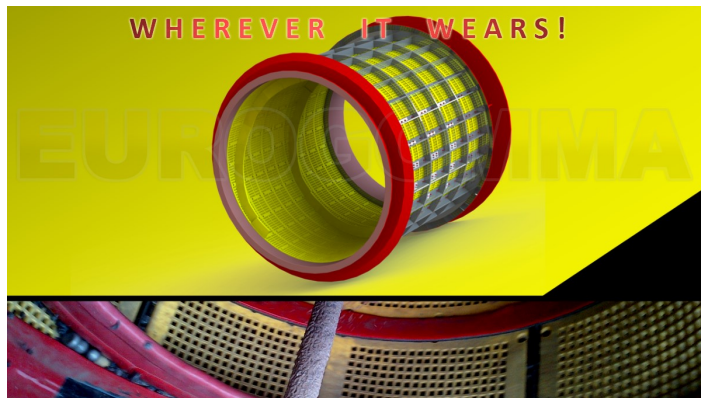

EUROGOMMA - Screen media and Polyurethane Products

Screening media—solutions and products

Its What We Do !

A few of the Products we offer

- Wear liners
- Extruded components
- Skirting, Lagging and Conveyor Belts
- Material Handling Hoses—with rubber or Ceramic inner wear lining
- Repair Clamps
- Expansion Joints
- Quick couplings
- Straub equivalent
- Ceramic lined Valves
- Fabricated spools with rubber or Ceramic lining on inside
- Trommel Fabrication
- Screen media
- Mill Liners and Furnishing

Services we offer

Site services at Shut down
On or Off site rubber or ceramic lining

Tank Lining

Remedial concrete repairs with
Poly Urea spray on corrosion protection

Free Screen media assessment

Trommel screen media, Mill lining and Scrubber liner installation and assessments
